

Galore Creek Mining Corporation

Exploration Geologist

Located in northwestern British Columbia, Galore Creek is one of the world's largest undeveloped porphyry copper-gold-silver deposits. Galore Creek Mining Corporation (GCMC), a partnership between Newmont Mining Corporation and Teck Resources Limited, is committed to improving the project economics and advancing the asset towards development. Working closely with the Tahltan Nation and other local communities, we strive for excellence in all our activities, with continuous improvement and responsible practices that contribute to sustainable development.

More information on the project is available at www.gcmc.ca.

REPORTING

Reporting to the Senior Project Geologist or Project Geologist, the Exploration Geologist will perform their duties as a member of the GCMC team. They are primarily accountable for geological mapping and geochemical sampling, by planning, administering and executing safe and effective field traverses. This position is focused on early-stage exploration target generation in a porphyry copper-gold environment.

OVERVIEW

We are currently seeking individuals for the role of Exploration Geologist for the 2019 field season at Galore Creek. This position is based out of the Galore Creek Uhtlān Exploration fly-in access camp in northwestern BC and work is on a rotational basis (20 days in, 10 days out).

The successful candidate would ideally have a start date of early May 2019. This position is a defined term position and employment with GCMC is expected to be from early May to October 31, 2019.

KEY RESPONSIBILITIES:

- Be a courageous safety leader, leading by example and fostering a proactive safety and sustainability culture based on the common values of health, safety, environment, and communities shared by the asset owners (Teck and Newmont).
- Actively seek opportunities to recognize health and safety hazards, resolve safety issues and work to mitigate associated risks in the workplace.
- Work collaboratively, sharing information and knowledge with the project team.
- Integrate and interpret geological, geophysical, and geochemical datasets.
- Plan and lead safe field traverses, and collect geochemical, lithological, structural, and mineralogical data.
- Collect a variety of sample types (rock, soil, stream sediments) for analytical, petrographic, geochronological purposes, organize samples, and ship sample batches to the laboratory using industry and project QA/QC protocol.
- Complete geological mapping at the district scale, interpret field data, and produce geological field maps.
- Produce presentations, reports, and maps for work completed during the field season.

- Efficiently manage their time to achieve exploration objectives.
- Communicate with supervisor on a regular basis and report all material exploration results on a timely basis.
- Mentor and show leadership to other members of the geoscience team.

KEY COMPETENCIES, KNOWLEDGE AND EXPERIENCE:

- BSc. Geological Sciences, Geological Engineering or equivalent. Relevant field or academic project work is an asset.
- Minimum 3-5 years related experience.
- Porphyry and epithermal related deposit experience.
- Experienced at digitizing mapping data, and creating maps in ArcGIS. Experience with Leapfrog Geo and ioGas software is an asset.
- Strong computer skills are required with experience in Microsoft Office Suite.
- Knowledge of proper QA/QC sampling procedures.
- A broad knowledge of geological, geophysical, and geochemical exploration techniques in porphyry and epithermal environments, and their integration, is considered an asset.
- Experience working in a diverse and multicultural environment.
- Ability to liaise with contractors and all persons on site and with all members of the team in a respectful and professional manner.
- Ability to navigate using a GPS, compass and map.
- Familiarity with Anaconda-style geological mapping.
- Comfortable planning and executing safe field traverses in mountainous terrain and various weather conditions.
- Previous experience working with helicopter-supported field programs.
- A results-focused attitude and strong time management skills.
- Excellent communication skills, both verbal and written. The ability to write clear and concise reports is particularly important, as well as the ability to present technical information to a variety of audiences.
- Ability to work as an effective project team member.
- Valid Class 5 Driver's license

HOW TO APPLY

Interested candidates should email their resume and cover letter to careers@gcmc.ca.

We wish to thank all applicants for their interest and effort in applying for the position; however, only candidates selected for interviews will be contacted.
